IN THE CLAIMS

Please amend claims 1-12 and add new claims 13-18 as follows:

- 1. (Currently Amended) Vaccine compositions A vaccine composition obtained from Streptomyces. They are characterized because in that they have comprise as active principle components of one or more wild strains of Streptomyces genus or mutant or recombinant strains derived from such strains, as well as an adequate excipient.
- 2. (Currently Amended) Vaccine A vaccine composition according to claim 1, characterized because in that said such Streptomyces strains are live strains.
- 3. (Currently Amended) Vaccine A vaccine composition according to claims claim

 1, and 2 characterized because in that such strains of Streptomyces are

 Streptomyces lividans, Streptomyces coelicolor and Streptomyces Sp.
- 4. (Currently Amended) Vaccine A vaccine composition according to claim 1, characterized because in that such recombinant strains of Streptomyces express one or more heterologous antigens of vaccinal interest.
- 5. (Currently Amended) Vaccine A vaccine composition according to claim 4, characterized because such in that recombinant strains of Streptomyces express one or more heterologous antigens of Mycobacterium.

- 6. (Currently Amended) Use of the vaccine composition of claims from claim1, to 5 for the prevention or therapeutics of infectious diseases.
- 7. (Currently Amended) Use of the vaccine composition, according to claim 6, for the prevention or therapeutics of infections caused by mycobacteria.
- 8. (Currently Amended) Use of the vaccine composition, according to claim 7, for the prevention or therapeutics of tuberculosis.
- 9. (Currently Amended) Use of the vaccine composition of claims from 1 claim 1, to 5 for the prevention or therapeutics of tumoral diseases.
- 10. (Currently Amended) Use of the vaccine composition of claims from 1 claim 1, to 5 for the prevention or therapeutics of auto-immune diseases.
- 11. (Currently Amended) Use of the vaccine composition of claims from 1 claim
 1, to 5 for the prevention or therapeutics of allergic diseases.
- 12. (Currently Amended) Use of the vaccine composition of claims from 1 claim 1, to 5 for the prevention of pregnancy.

- 13. (New) A vaccine composition comprising at least one wild strain of a streptomyces genus or mutant and an excipient.
- 14. (New) The vaccine composition of claim 13, wherein the strain comprise recombinant forms of said wild strain.
- 15. (New) The vaccine composition of claim 13, said streptomyces comprising at least one selected from streptomyces lividans, streptomyces coelicolor and streptomyces Sp.
- 16. (New) The vaccine of claim 14, said recombinant strain expresses one or more heterologous antigens of mycobacterium
- 17. (New) A vaccine for the prevention of a pregnancy in a mammal having the need for such prevention, said vaccine comprising a vaccine composition obtained from streptomyces comprising an active component of one or more wild strains and excipient.
